

HITACHI

Brushless UVP Rotary Hammer Drill DH52MEY(G1)

- Maintenance-free¹ high performance Brushless motor – providing stable performance under voltage drop situations, e.g. using long extension leads
- Stable Performance when used with Generators
- High durability - internal double-insulation construction with a sturdy alloy core (AHB) and a plastic internal stator holder
- 2-mode – Hammer only & Hammer Drilling
- Features Hitachi's User Vibration Protection and vibration-absorbing handle
- Built-in electronic 4-stage control switch – easily adjust the drilling speed impact rate with the press of a button

STANDARD WITH: Side handle, depth gauge and carry case

MODEL	CAPACITY MASONRY	BIT SHANK	POWER INPUT	NO-LOAD SPEED	FULL LOAD IMPACT RATE	IMPACT ENERGY PER STROKE	OVERALL LENGTH	WEIGHT
DH52MEY(G1)	Drill bit 52mm/Core bit 160mm	SDS MAX	1,500W	110-280/min	1,000-2,400/min	22.0J	585mm	11.0kg

1. Because the rotor has no coil or commutator there is no risk of armature burnout, or the need to replace carbon brushes.
